PLANTER BOX TREATMENT & MICROBIAL SYSTEM FOR BUILDING ROOT MASS & OPTIMIZING NUTRIENT UPTAKE

YIELDLINE™ LAUNCH MAX CORN™ is a best-in-class 80/20 talc/graphite combination that ensures optimum performance in today's high-speed planters. Can take the place of any seed fluency agent.

The base product also includes 1.35 pounds of Zinc plus Iron and Manganese. These micronutrients are essential building blocks to drive fast emergence and strong, healthy plants.

Launch Max is powered by BIO-CAPSULE TECHNOLOGY™ (BCT) – a patented delivery system that helps farmers save time, labor and fuel. The BCT carrier system allows for the addition of multiple biological solutions safely packaged for convenient deployment at planting.

The Launch Max BIO-CAPSULES are charged with Terrasym® and an industry-leading consortium of bio-fertility & N-fixing microbes. See diagram below.
