

# PRO<sup>̄</sup>NET<sup>®</sup>

## Premium All-Purpose Agricultural Net Wrap

ProNet<sup>®</sup> is the industry standard for reliable, high-performance bale wrapping. Engineered to provide a consistent wrap and superior protection, ProNet<sup>®</sup> ensures your forage remains secure from the field to the feeder.

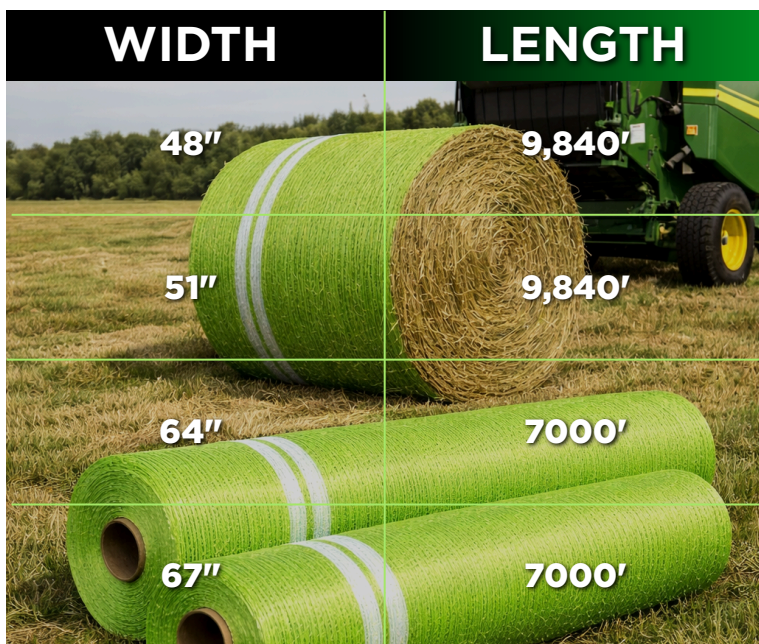

### PRODUCT OVERVIEW

Manufactured from 100% virgin high-density polyethylene (HDPE), ProNet<sup>®</sup> is designed for high-speed baling and smooth feeding. It features a unique knit pattern that provides consistent tension across the entire width of the bale.

### AVAILABLE SIZES

ProNet<sup>®</sup> is available in various widths and lengths to fit all major round baler brands:

### KEY FEATURES & BENEFITS

#### OPTIMIZED TENSILE STRENGTH

Built to handle standard hay and silage bales with high resistance to breakage.

#### UV STABILIZATION

Advanced UV inhibitors protect the net from degradation during outdoor storage.

#### RED WARNING STRIPE

A high-visibility stripe appears within the last 50 meters of the roll to prevent mid-bale runouts.

#### SOFT & PLIABLE

Gentle on equipment while maintaining a firm grip on the crop for a tight, professional-looking bale.

### TECHINCAL SPECIFICATIONS

#### MATERIAL:

100% HDPE (Virgin Resin)

#### DESIGN:

Reinforced edge-to-edge knit

#### COMPATIBILITY:

All major round baler brands (John Deere, Vermeer, New Holland, etc.)

#### CERTIFICATION:

Signum Test Certified
